Design a Boardgame

This activity could be done as a solo activity or with a partner. Any more than that and things will get a little messy.

This game could be either:

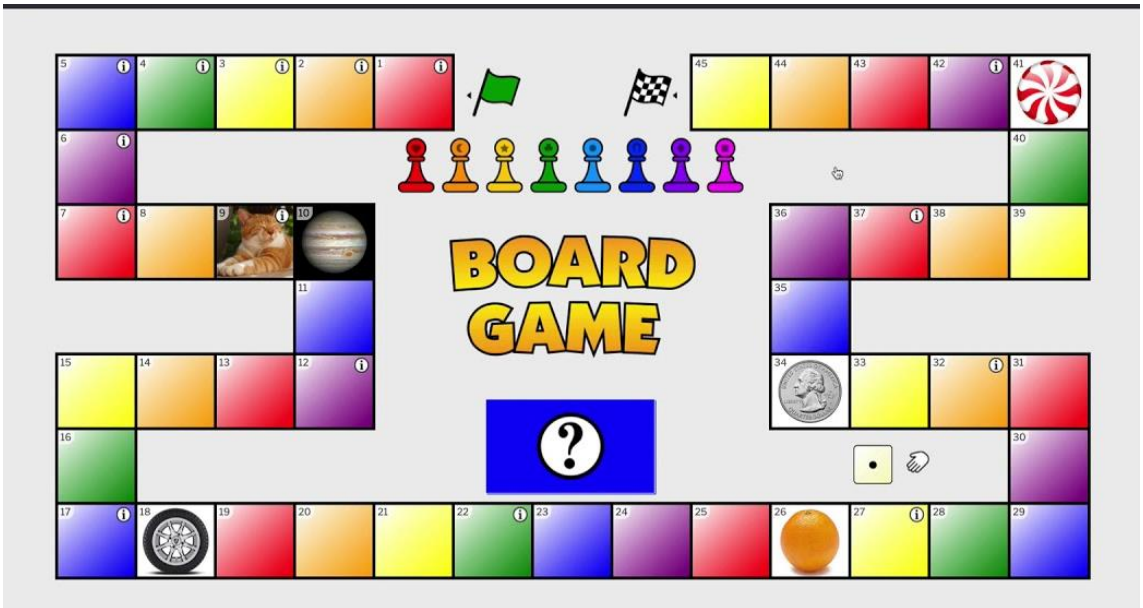
A game to help someone going through lockdown to keep them busy

OR

A game all about lockdown/global pandemic

How you choose to do this game is up to you. It could be done one Piccolage or something similar and printed with dice and pieces to go with it, or it could be made by hand.

You will need:

- The game itself
- Any pieces or dice you might need
- A full set of instructions on how to play (written or video)
- A name for your game
- To test out the game once it is finished and make some changes


Have a look online at games that already exist for inspiration.
