

A COVID-19 TIMELINE

For this activity, you will need to do some research.

Your timeline may span from March 2020 (when the original lockdown began in the UK) to March 2021, or you may wish to include a predictions section further on and/or information about the start of the pandemic globally.

You could include:

- Facts about the pandemic
Find out dates of when:
 - First cases were recognised
 - First cases in Wales were announced
 - Lockdown began/ended/started again
 - Wearing masks became mandatory
 - Schools closed/reopened
 - The first vaccine was announced
 - The first people had the vaccine in UK/Wales
- Some funny moments (e.g. toilet paper is sold out, the dog becomes fed up of 6 walks a day)
- Personal dates (e.g. lockdown birthday, Christmas)

Try to include a short piece of information to explain any dates you choose that are personal to you.

Example timeline:
